

Choose your Species

Reproduction Case Study

*Before you choose your species, watch the video links and study the key terms on the next page. Then answer the following questions and organize your discoveries into a **PowerPoint Presentation**.*

Reproduction:

- 1) Describe how the organism **reproduces** (*internal vs. external fertilization, advantages vs. disadvantages of this type of reproduction, etc*).
- 2) Explain the organism's **mating rituals** (*reproductive behaviours and courtship displays*).
- 3) Describe how the organism's **offspring develop**.

Successful Genetic Features:

- 1) Explain **5 features** of the organism that allows it to thrive/survive in its environment.
- 2) Describe **2 environments** that the organism would not survive in and list **3 reasons why** for each.

Indigenous story about a local species in B.C.

(Does not have to be your chosen species)

- 1) Describe a **story or legend** about a significant species to the Indigenous peoples of British Columbia.
